PROFESSIONAL SUMMARY

I'm an **iOS Developer** who loves to work with the latest technologies in iOS. I love to work on UI and design. I've done many internships which helped me grow as an iOS Developer. Below is a brief summary of it.

- Develop applications using **Swift, XCode, Interface Builder, Compositional Layout, Instruments, Cocoa Touch,** and other iOS development tools.
- Collaborate as a member of an **agile team** to get products developed and completed with best-in-class software development.
- Very good hands-on experience with **SwiftUI** and **Combine** frameworks.
- Developed apps using various iOS design patterns (**MVC, Delegation, Protocols, Singleton, MVVM**).
- Good understanding of **UI guidelines**, and experience with **UITableView, UIStackView, UITabBar, UINavigationView,** and **third-party view components**.
- Proficiency with common **APIs** (**Email, WebView, Contact Manager, Camera, Push Notifications, Bluetooth**).
- Experience with implementing push notifications (**Firebase, SNS**), **animations**, **user location, XMPP chat, payment gateway**.
- Experience with **RESTful, JSON/ XML/ SOAP** Web Services.
- Experience as **iOS Native Developer** on **Xcode** using **UIKit, Cocoa Touch,** and **Cocoa Service Frameworks** and **third-party libraries**.
- Experienced in provisioning and publishing applications in **App Store** with working knowledge of **publishing procedures** and **review process**.
- Experience helping and working as project **management designing plans**, **distribution of work**, and **time schedules**, especially when new technologies arrive that the company wants to implement.
- Well-versed with **PhotoShop** and **Illustrator**.
- Work closely with other Product Development teams to **improve consistency** and **timing of releases**
- Highly efficient with source control platforms like **GitHub.**
- Experience to **profile**, **debug** and **optimize apps** and able to **diagnose application crashes**.
